Today the Houston Chronicle announced its endorsement of my opponent for the Houston Independent School District 6 board position. When making that announcement, the paper cited that I had been “indefinitely suspended” by the city of Houston for sexual harassment. For the record, let me state that this decade old allegation is false. The allegations were baseless, without evidence, witnesses, or corroboration. In fact, the state of Texas ruled in my favor in awarding me state compensation and denied the city’s claim. The city forced me out because of my participation in highly visible ministerial activities against the previous Mayor’s policies during non-working hours.

Today my family and I are enjoying full retirement benefits from my years of service with the city which allows me to devote all my time and energy to this campaign and ultimately to you as a board member for district 6.

My supporters are disappointed but not surprised because the chronicle’s factual history of supporting liberal candidates who advocate for status quo government. In light of the FACT the Texas Education Agency is pursuing the official takeover of HISD resulting from my opponent’s inappropriate and possible illegal actions while in office including a possible current criminal investigation, it should concern all taxpayers.

In endorsing my opponent, the HC stated my opposition to mask mandates is “troubling.” For the record again, we are a nation of rights and freedoms. Each American should NOT face criminal or civil penalties because of government overreach.
